Rx	acetaminophen 325 mg oral tablet	2 tab(s) orally 4 times a day as needed for pain	Active	08-30-2023	5

Discontinued/Held Medications

No discontinued or held medications identified in the current record.

Potential Concerns

Drug Interactions:

- Clonazepam + Trazodone: Increased risk of CNS depression
- Multiple CNS-active medications (benztropine, clonazepam, trazodone, bupropion) may have additive effects

Missing Information:

- Bupropion: Strength/dose not specified
- Lidocaine: Specific affected area not specified
- Hydrocortisone: Specific affected area not specified

Unusual Dosages:

- Trazodone 100mg at bedtime (2 x 50mg tablets) - higher than typical starting dose
- Prednisone 40mg daily (2 x 20mg tablets) - high dose, should have tapering plan
